GWG 1028 Kikutsurudoi

W628 Kikutsurudoi is a large bull for its bloodline. His decendants are usually good built animals with heavy carcasses. His father, Kikutsurudoi 146, and his grandfather Tanifukudoi are decendants of the famous ‘Hyogo Cow’ (Kikutsuru). She is known for giving size to animals high in Tajima. The mother of Kikutsurudoi W628, Kinu T077, stems from the first 100% Tajima cow to ever leave Japan. Decendants of Kikuyasudoi W628 are known to mature quite early and for great meat quality.

GWG 1028 Kikutsurudoi can be used on fullblood cows and as a father of bulls that are ideal for breeding F1 cattle.
