## ♂ GWG1028 KIKUTSURUDOI 393

### GWG 1028 Kikutsurudoï

W628 Kikutsurudoï is a large bull for its bloodline. His decendants are usually good built animals with heavy carcasses. His father, Kikutsurudoï 146, and his grandfather Tanifukudoï are decendants of the famous 'Hyogo Cow' (Kikutsuru). She is known for giving size to animals high in Tajima. The mother of Kikutsurudoï W628, Kinu T077, stems from the first 100% Tajima cow to ever leave Japan. Decendants of Kikuyasudoï W628 are known to mature quite early and for great meat quality.

GWG 1028 Kikutsurudoï can be used on fullblood cows and as a father of bulls that are ideal for breeding F1 cattle.
