

## A black and white photograph of a dark-colored cow, likely a beef breed, standing in a grassy field. The cow is facing right, and its head is turned slightly towards the camera. It has a yellow tag on its left ear and is holding a rope in its mouth. The cow's body is well-muscled, and its legs are dark. In the background, there is a metal fence and a line of trees under a clear sky.

♂ GWG1609z Hikoshigefuji 295

Kikutsurudoi is a large bull for his bloodline (100% Tajima). His progeny are usually good framed on feed, allowing for bigger and heavier carcasses. His father Kikutsurudoi TF146 and his grandfather Tanifukudoi are descendants of the most famous cow in Japan, Kikutsuru known nationally as the 'Hyogo Cow'. She is credited for increasing size in Tajima cattle.

Hikoshigefuji Y342 stems from the Itozakura bloodline. Every line traces to the most famous bull in Japan – Dai 7 Itozakura. Itoshigefuji TF147, Y342's sire, was born in Japan and weighs 1200 kg. He is a line bred son of Itofuji and his dam Dai 30 Noboru is a direct descendent of Takenotanitsuru. Y342's dam Hikohime T039 is a granddaughter of the famous Itozakura son Itohana (BMS of +4.3). Y342 progeny's carcass quality exceeded the expectations of his pedigree. The strength, constitution, milk and forage have left his daughters the best brood cows in his herd.
