GWG 1301 x GWG 1028

GWG 1301 Ms Teruyasu x GWG 1028 Kikutsurudoi

The Mother of GWG 1301 is a descendant of **Blackmore Aizatzurudoi Y398**
Aizatzurudoi Y398 is known for breeding a combination of outstanding female replacements and steer carcasses of outstanding meat quality. He weighs close to 900kgs putting him at a similar weight as some 100% Fujiyoshi or Kedaka blood bulls. Sibling sisters are making great breeding cows with good milking ability and sibling carcasses have graded consistently 9+ at better than average carcass weights. Further, female offspring have good milking ability and excellent fertility (GWG1003s sister produced 46 embryos (a) and had twins from the same flush)
Aizatzurudoi Y398's sire is Fukutsuru 068 (number one rated sire in terms of marbling).
TF726 Kimifuku = Father of GWG1301 = Good marbling, average frame Blackmore Kikutsurudoi W628 = Father of GWG 1028 = Medium size / calves with good proportions, mature early, good meat quality, "Kikutsuru heritage" – great quality. Also good for F1.
GWG1028 Kikutsurudoi
Kikutsurudoi is a large bull for his bloodline (100% Tajima). His progeny are usually good framed on feed, allowing for bigger and heavier carcasses. His father Kikutsurudoi TF146 and his grandfather Tanifukudoi are descendents of the most famous cow in Japan, Kikutsuru know nationally as the 'Hyogo Cow'. She is credited for increasing size in Tajima cattle.
