GWG1314 Ms Aizakura x GWG1028 Kikutsurudoi

GWG 1314 Ms Aizakura x GWG 1028 Kikutsurudoi

The mother of GWG 1314 is a descendant of the pairing between **Chiyotake A126 (female) and Blackmore Aizatzurudoi Y398 (male).** Calves are good and fertile mother cows. They have above average carcass weight, are high marbling and bulls have good meat quality.
The cows father is a descendant of the pairing between TF701 (female) and TF148 Itoshigenami. Descendants of Itoshigenami usually have a medium size, excellent marbling, average maternal sires and a good amount of milk.

Blackmore Kikutsurudoi W628 = Father of GWG 1028 = Medium size / calves with good proportions, mature early, good meat quality, “Kikutsuru heritage” – great quality. Also good for F1. Kikutsurudoi is a large bull for his bloodline (100% Tajima). His progeny are usually good framed on feed, allowing for bigger and heavier carcasses. His father Kikutsurudoi TF146 and his grandfather Tanifukudoi are descendents of the most famous cow in Japan, Kikutsuru know nationally as the ‘Hyogo Cow’. She is credited for increasing size in Tajima cattle.
