			Chiyotake 14/1

GWG1004 Ms Itoshigefuji x GWG1202 Haruki II

Sire: GWG2012 Haruki II combines the best Japanese bloodlines in its pedigree. GWG2012 Haruki II weighs a proud 1,100 kg and has a result of 8/9/9. His father, Haruki-2 is an exceptional bull. If you are looking for a bull with balanced genetics and high performance in several properties, you will always come across Haruki-2. If you look at American and Australian reviews, you can see the genetic strength of Haruki-2 – it improves carcass characteristics, size and in female descendants, milk yield. In the “Australian Sire Summary” he leads the list in 6 different categories. There is probably no competition among the “high marbling bulls” that simultaneously pass on size and muscle distribution. Haruki-2 is also the father of the famous bull Shigeshigetani – one of the most stable “marbling bulls”.

Dam: Aizatzurudoi Y398 is known for breeding a combination of outstanding female replacements and steer carcasses of outstanding meat quality. He weighs close to 900kgs putting him at a similar weight as some 100% Fujiyoshi or Kedaka blood bulls. Sibling sisters are making great breeding cows with good milking ability and sibling carcasses have graded consistently 9+ at better than average carcass weights. Further, female offspring have good milking ability and excellent fertility (GWG1003s sister produced 46 embryos (a) and had twins from the same flush).
Aizatzurudoi Y398’s sire is Fukutsuru 068 (number one rated sire in terms of marbling).
