Blackmore Kikutsurudoï W628 = father of GWG1025

Good size / well-proportioned calves, good meat quality.

Kikutsurudoï W628 is a big bull for its bloodline. His descendants are mostly well built animals with large and heavy carcasses. His father Kikutsurudoï 146 and his grandfather Tanifukudoï are descendants of the most famous Japanese cow – Kikutsuru, which is known in Japan as the 'Hyogo Cow'. Her strength is to increase the size of the Tajima animals.

Blackmore Aizatsurudoï A015

Female offspring are good breeding cows and have a relatively good milk yield. They often have large loins and cube rolls. A015 is 91.5% Tajima.
